Unganisha- Master plan and model for a large-scale landscape program for sustainable development and nature conservation

**OIKOS EAST AFRICA**

**OIKOS EAST AFRICA**  
**Tender No: OEA/05TZ/2025/02**  
**For**  
**SUPPLY OF CCTV CAMERAS AND RELATED EQUIPMENT FOR ROADKILL MITIGATION ON**  
**THE ROAD T2 IN LONGIDO DISTRICT**

**INVITATION TO TENDER**

**Date: 13th February 2025**

Oikos East Africa under BMZ Unganisha project funded by The German Cooperation in partnership with WWF Tanzania is implementing a transboundary project that seeks to restore key natural resources across the Kilimanjaro and Mkomazi landscapes to bring benefits to wildlife and people. The project focuses on securing critical wildlife corridors and dispersal areas, therefore working on addressing various drivers in critical forests, farmlands, rangeland ecosystems, and wildlife corridors for the benefit of biodiversity and people.

One of the project objectives is to develop a model of connectivity beyond road barriers for the West Kilimanjaro area, including a pilot road ecology analysis, develop a mitigation plan and implement measures to reduce traffic-related wildlife mortality on the Arusha-Namanga T2 road. As part of our efforts to monitor and mitigate roadkill incidents along the T2 road, we intend to install advanced CCTV cameras and related equipment including control room equipment, capable of monitoring wildlife and vehicle collisions leading to legal actions by the police forces.

Oikos invites tenderers to supply and install high-quality CCTV cameras with the capability to capture clear footage both during the day and at night for continuous monitoring along designated road sections (8 hotspots within a distance of 32 km).

**Suppliers required profile**

The interested suppliers must meet and show in their proposal the following requirements:

- a. Proven track record in supplying and installing CCTV cameras on roads, especially to monitor vehicles and wildlife or road incidences.
- b. Valid business registration and tax clearance certificates.
- c. Ability to provide the equipment outlined in the TOR.

The detailed terms of reference are available under request by email to Procurement [procurement@oikosea.org](mailto:procurement@oikosea.org) before 20<sup>th</sup> February 2025. A site visit will be organised on the 21<sup>st</sup> of February as detailed in the terms of reference.

The complete Tender in pdf format must be submitted to the email address [procurement@oikosea.org](mailto:procurement@oikosea.org) before 9<sup>th</sup> March 2025, 6pm.
